

SOLUTION BRIEF

# Hunt, contain, neutralize:

Unleashing the power of SonicSentry MDR for Capture Client.

MSPs – the time has come to join forces with SonicSentry MDR for Capture Client and forge a co-managed security powerhouse. This collaborative approach to endpoint security unleashes the combined expertise of your team and our dedicated MDR analysts, leaving no cyber threat undetected, no client unprotected and no stone unturned.

In today's turbulent cyber landscape, MSPs often face the same challenges as their clients: they lack a dedicated team of threat analysts and researchers to manage and mitigate cybersecurity threats. They need proactive guardians and relentless threat hunters who can identify dangerous activity before it propagates into a serious security event.

That's where SonicWall, a leader in cybersecurity solutions, comes in. We understand the challenges you face, and we're here to help.

We're pleased to fuse Capture Client--our advanced EDR solution, powered by SentinelOne's industry-leading technology--with the threat expertise of the SonicSentry Security Operations Center. SonicSentry MDR for Capture Client will act as a force multiplier to your current efforts.

## How Capture Client MDR Works

While you and your clients sleep peacefully, a dedicated team of MDR analysts surveils their endpoints, evaluates anomalies and proactively hunts for hidden threats, neutralizing risks before they can inflict harm.

When a threat is detected, SonicSentry MDR uses automated containment such as blocking network access and rolling back changes, while dedicated analysts can isolate endpoints directly through Secure Remote Shell. Suspect hosts can be isolated and quarantined in a secure temporary environment, where they can go through mitigation and cleaning, and further disruption is prevented.

Our SOC service proactively safeguards your clients' networks through meticulous bi-monthly configuration audits. Every 15 days, your clients' endpoints undergo a comprehensive security check, ensuring optimal configurations and highlighting potential vulnerabilities before they can be exploited. Detailed reports delivered alongside each audit equip you with actionable insights, empowering you to maintain an ironclad security posture.

MSPs can promote their services and forge a powerful alliance with SonicSentry MDR for Capture Client. This co-managed solution empowers you to deliver proactive, expert-driven endpoint cybersecurity to your clients while freeing your team to focus on growth, innovation and efficiency.

SONICWALL®

SonicSentry strengthens your cybersecurity offerings, helping you attract and retain customers. It's a proactive force multiplier, equipping you to hunt threats before they strike. You'll also benefit from 24/7 monitoring and tracking by expert analysts, including a robust arsenal of features like behavioral monitoring, threat hunting with deep visibility, malware analysis and detection, content filtering, firewall integration and enforcement, and much more! Your team will have more time to spend on client engagement and growth, and your customers will gain peace of mind knowing a team of relentless cyber guardians is protecting their endpoints.

By offering the protection of SonicSentry, you'll gain an edge on your competitors, elevate your brand, and further establish yourself as a trusted security partner in the face of ever-evolving cyber threats.

### The SonicSentry MDR for Capture Client Advantage:

- **24/7 Monitoring and Tracking** → Expert analysts monitor your clients' environments around the clock, ensuring threats are detected and addressed swiftly, regardless of the time or day.
- **Rapid Response and Minimized Damage** → MDR experts neutralize threats before they can cause downtime, data loss or reputational harm, protecting your client's assets and business continuity.

- **Freed Resources and Enhanced Efficiency** → Offload the resource-intensive tasks of threat hunting and incident response to MDR experts, allowing your team to focus on strategic growth and client relationships.
- **Scalability and Expertise at Your Fingertips** → Deliver comprehensive, expert-driven security to more clients without sacrificing quality or expanding your internal team, enabling business growth without compromising protection.
- **Cost-Effective Cybersecurity Strategy** → Access cutting-edge technology and human expertise without the need for significant investments in infrastructure or in-house security teams.

SonicSentry MDR for Capture Client isn't just a service. It's a force multiplier for your cybersecurity expertise--and your business.
